

# PICCOLO BLINDER<sup>T20</sup>

# DES CRIP TION

The Piccolo Blinder is small but mighty. This unit features a single source 120 Watt LED engine that produces a bright 3000K Color Temp blinder effect. It is also IP 65 rated and can be used outdoors.

Its compact size allows for easy positioning, making it great when multiple units need to be arrayed or placed between lights where traditional blinders are not easily placed.

The Piccolo can also be grouped using a dual mount or a 4 unit mount accessory to create a regular blinder effect in small rooms.

# Features.

## COMPACT

The Piccolo's compact size allows for easy and unique positioning.
